**Award-winning orthopaedic and
spinal treatment in central London.**

World-class experts providing world-class care, every day.

Schoen Clinic London is an award-winning, specialist private hospital delivering first class spinal and orthopaedic treatment for adults. We work with specialists including spinal surgeons, orthopaedic consultants, musculoskeletal physicians, radiologists, physiotherapists, sports physicians and specialist nurses to give every patient access to the very best treatments and outcomes, based on the latest evidence and research.

Our state-of-the-art Central London hospital consists of 39 custom designed, en-suite inpatient bedrooms and includes onsite diagnostic imaging, outpatient consulting suites, conservative therapies, surgical treatment, inpatient care, and physiotherapy all under one roof. We welcome privately insured, self-funding and international patients and offer a Multi-Disciplinary Team (MDT) approach, so every patient is at the centre of a team of world-class experts throughout their treatment journey.

Schoen Clinic London is part of Germany's largest family-owned healthcare group. With 26 locations in Germany and the UK and 10,000 employees, Schoen Clinic Group treats around 300,000 patients each year.

Taking every step to be as safe as possible.

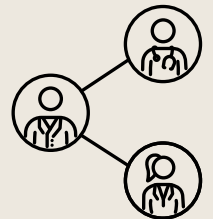

See a Consultant virtually, from the comfort of your own home if you prefer.

Face to face appointments, diagnostic imaging and outpatients procedures are available, using our safe patient pathways.

You are at the centre of a Multi-Disciplinary Team throughout your treatment journey.

Minimal waiting times for surgery.

Everything from consultation to your surgery happens at our hospital.

Resident Consultant Critical Care Physicians

At Schoen Clinic London, we are one of very few private hospitals to provide medical cover on the Wards using resident Consultant Critical Care Physicians. They have years of experience in caring for patients across a very broad range of specialities and are experts in early diagnosis and intervention in the unlikely event of a complication post-surgery.
